“We are so proud of our contractors! We can only change an industry if we pick the right people to be on the team. We can’t guarantee that you will have the perfect experience every time, because anything can happen in this world, but we will guarantee that the final product will be quality and the contractor will be held accountable to deliver as promised. If the contractor fails to do what they were contracted to do, then WE will pay up to \$10,000 out of our own pockets to fix the issue. We believe this is the example of TRUE accountability and responsibility!”
